Contents Volume 185 1999

Able KP → Bingman VP
Alania MA, Panchin YV, Sakharov DA: Pleural-buccal interneurons in the pteropod mollusc *Clione limacina* 267
Atema J → Gomez G

Baker TC → Fadamiro HY
Barth FG: Martin Lindauer, on the occasion of his 80th birthday 215
Behrend O, Kössl M, Schuller G: Binaural influences on Doppler shift compensation of the horseshoe bat *Rhinolophus rouxi* 529
Berry J → Srinivasan MV
Bingman VP → Strasser R
Bingman VP, Able KP, Siegel JJ: Hippocampal lesions do not impair the geomagnetic orientation of migratory savannah sparrows 577
Bischof H-J → Schmidt A
Bleckmann H → Mogdans J
Bleckmann H → Plachta D
Breuner C → Wikelski M
Bullock TH: Neuroethology has pregnant agendas 291

Carney M → Frazier SF
Casasnovas B, Fénelon VS, Meyrand P: Ontogeny of rhythmic motor networks in the stomatogastric nervous system 361
Catania KC: A nose that looks like a hand and acts like an eye: the unusual mechanosensory system of the star-nosed mole 367
Chen B, Meinertzhagen IA, Shaw SR: Circadian rhythms in light-evoked responses of the fly's compound eye, and the effects of neuromodulators 5-HT and the peptide PDF 393
Cheng K → Srinivasan MV
Cossé AA → Fadamiro HY

DiCaprio RA → Frazier SF
Dyer AG: Broad spectral sensitivities in the honeybee's photoreceptors limit colour constancy 445

Engelage J → Schmidt A
Erber J → Scheiner R
Errandonea P → Silva A

Fadamiro HY, Cossé AA, Baker TC: Fine-scale resolution of closely spaced pheromone and antagonist filaments by flying male *Helicoverpa zea* 131
Faulstich M → Kössl M
Fénelon VS → Casasnovas B
Field LH → Nishino H
Frank G → Kössl M
Frank TM, Widder EA: Comparative study of the spectral sensitivities of mesopelagic crustaceans 255
Frazier SF, Larsen GS, Neff D, Quimby L, Carney M, DiCaprio RA, Zill SN: Elasticity and movements of the cockroach tarsus in walking 157
Fuchs PA → Yuhas WA

Galeano M → Silva A
Gerhardt HC, Schul J: A quantitative analysis of behavioral selectivity for pulse rise-time in the gray treefrog, *Hyla versicolor* 33
Gibson G → Land MF
Giurfa M, Zaccardi G, Vorobyev M: How bees detect coloured targets using different regions of their compound eyes 591
Gomez G, Voigt R, Atema J: Temporal resolution in olfaction III: flicker fusion and concentration-dependent synchronization with stimulus pulse trains of antennular chemoreceptor cells in the American lobster 427
Grünewald B: Physiological properties and response modulations of mushroom body feedback neurons during olfactory learning in the honeybee, *Apis mellifera* 565

Haas W → Osterkamp J
Hall JC: GABAergic inhibition shapes frequency tuning and modifies response properties in the auditory midbrain of the leopard frog 479
Heisenberg M → Martin J-R
Hemmi JM: Dichromatic colour vision in an Australian marsupial, the tammar wallaby 509
Herberholz J, Schmitz B: Flow visualisation and high speed video analysis of water jets in the snapping shrimp (*Alpheus heterochaelis*) 41
Horridge GA: Pattern vision of the honeybee (*Apis mellifera*): the effect of pattern on the discrimination of location 105
Horwood J → Land MF
Hudson R: From molecule to mind: the role of experience in shaping olfactory function 297

Ikeda J → Okada R

Jen PH-S, Zhou XM: Temporally patterned pulse trains affect duration tuning characteristics of bat inferior collicular neurons 471

Kenagy GJ → Wikelski M
Knudsen EI: Mechanisms of experience-dependent plasticity in the auditory localization pathway of the barn owl 305
Koivula M, Koskela E, Viitala J: Sex and age-specific differences in ultraviolet reflectance of scent marks of bank voles (*Clethrionomys glareolus*) 561
Koskela E → Koivula M
Kössl M → Behrend O
Kössl M, Mayer F, Frank G, Faulstich M, Russell IJ: Evolutionary adaptations of cochlear function in Jamaican mormoopid bats 217
Krontiris-Litowitz J: Sensitizing stimulation causes a long-term increase in heart rate in *Aplysia californica* 181
Kurokawa M, Kuwasawa K, Matsumura S: Identification of an abdominal ganglion neuron antagonizing L7-driven gill contraction in *Aplysia* 11
Kuwasawa K → Kurokawa M

Land MF, Gibson G, Horwood J, Zeil J: Fundamental differences in the optical structure of the eyes of nocturnal and diurnal mosquitoes 91
Land MF: Motion and vision: why animals move their eyes 341
Langner G → Schulze H
Larsen GS → Frazier SF
Lewis JE: Sensory processing and the network mechanisms for reading neuronal population codes 373
Lösel PM → Potting RPJ
Lynn S → Wikelski M

Macadar O → Silva A
Machemer H → Machemer-Röhnisch S
Machemer-Röhnisch S, Nagel U, Machemer H: A gravity-induced regulation of swimming speed in *Euglena gracilis* 517
Malyshev AY, Norekian TP, Willows AOD: Differential effects of serotonergic and peptidergic cardioexcitatory neurons on the heart activity in the pteropod mollusc, *Clione limacina* 551
Martin J-R, Raabe T, Heisenberg M: Central complex substructures are required for the maintenance of locomotor activity in *Drosophila melanogaster* 277
Matsumura S → Kurokawa M
Mayer F → Kössl M
Meinertzhagen IA → Chen B
Menzel R → Pflüger H-J
Menzel R: Memory dynamics in the honeybee 323
Meyrand P → Casasnovas B
Mizunami M → Okada R
Mogdans J → Plachta D
Mogdans J, Bleckmann H: Peripheral lateral line responses to amplitude-modulated sinusoidal wave stimuli 173

Nagel U → Machemer-Röhnisch S
Neff D → Frazier SF
Nickla DL, Rada JA, Wallman J: Isolated chick sclera shows a circadian rhythm in proteoglycan synthesis perhaps associated with the rhythm in ocular elongation 81
Nishino H, Sakai M, Field LH: Two antagonistic functions of neural groups of the femoral chordotonal organ underlie thanatosis in the cricket *Gryllus bimaculatus* DeGeer 143
Norekian TP → Malyshev AY

Okada R, Ikeda J, Mizunami M: Sensory responses and movement-related activities in extrinsic neurons of the cockroach mushroom bodies 115
Olivera BM: *Conus* venom peptides: correlating chemistry and behavior 353
Osterkamp J, Wahl U, Schmalfuss G, Haas W: Host-odour recognition in two tick species is coded in a blend of vertebrate volatiles 59

Page Jr RE → Pankiw T
Page Jr RE → Scheiner R
Panchin YV → Alania MA

Pankiw T, Page Jr RE: The effect of genotype, age, sex, and caste on response thresholds to sucrose and foraging behavior of honey bees (*Apis mellifera* L.) 207
Pflüger H-J, Menzel R: Neuroethology, its roots and future 389
Plachta D, Mogdans J, Bleckmann H: Responses of midbrain lateral line units of the goldfish, *Carassius auratus*, to constant-amplitude and amplitude-modulated water wave stimuli 405
Potting RPJ, Lösel PM, Scherkenbeck J: Spatial discrimination of pheromones and behavioural antagonists by the tortricid moths *Cydia pomonella* and *Adoxophyes orana* 419

Qazi S, Trimmer BA: The role of nitric oxide in motoneuron spike activity and muscarinic-evoked changes in cGMP in the CNS of larval *Manduca sexta* 539
Quimby L → Frazier SF
Quintana L → Silva A

Raabe T → Martin J-R
Rada JA → Nickla DL
Röll B, Schwemer J: ι-Crystallin and vitamin A_2 isomers in lenses of diurnal geckos 51
Roverud RC: Frequency discrimination of brief tonal steps as a function of frequency in the lesser bulldog bat 247
Russell IJ → Kössl M

Sakai M → Nishino H
Sakharov DA → Alania MA
Sauer AE, Stein W: Sensorimotor pathways processing vibratory signals from the femoral chordotonal organ of the stick insect 21
Scheiner R, Erber J, Page Jr RE: Tactile learning and the individual evaluation of the reward in honey bees (*Apis mellifera* L.) 1
Scherkenbeck J → Potting RPJ
Schmalfuss G → Osterkamp J
Schmidt A, Engelage J, Bischof H-J: Single cell responses from the optic tectum of the zebra finch (*Taeniopygia guttata castanotis* Gould) 69
Schmitz B → Herberholz J
Schul J → Gerhardt HC
Schuller G → Behrend O
Schulze H, Langner G: Auditory cortical responses to amplitude modulations with spectra above frequency receptive fields: evidence for wide spectral integration 493
Schwemer J → Röll B
Shaw SR → Chen B
Siegel JJ → Bingman VP
Silva A, Quintana L, Galeano M, Errandonea P, Macadar O: Water temperature sensitivity of EOD waveform in *Brachyhypopomus pinnicaudatus* 187
Smith GT: Ionic currents that contribute to a sexually dimorphic communication signal in weakly electric fish 379
Srinivasan MV, Zhang SW, Berry J, Cheng K, Zhu H: Honeybee navigation: linear perception of short distances travelled 239
Stein W → Sauer AE
Strasser R, Bingman VP: The effects of hippocampal lesions in homing pigeons on a one-trial food association task 583
Stumpner A: Comparison of morphology and physiology of two plurisegmental sound-activated interneurones in a bushcricket 199

Tomioka K: Light and serotonin phase-shift the circadian clock in the cricket optic lobe in vitro 437
Trimmer BA → Qazi S

Viitala J → Koivula M
Voigt R → Gomez G
Vorobyev M → Giurfa M

Wahl U → Osterkamp J
Wallman J → Nickla DL
Weissburg MJ: Tuning breadth and sex-specific sensitivity in chemosensory neurons of male and female *Uca pugnax* 229
Widder EA → Frank TM
Wikelski M, Lynn S, Breuner C, Wingfield JC, Kenagy GJ: Energy metabolism, testosterone and corticosterone in white-crowned sparrows 463
Willows AOD → Malyshev AY
Wingfield JC → Wikelski M

Yuhas WA, Fuchs PA: Apamin-sensitive, small-conductance, calcium-activated potassium channels mediate cholinergic inhibition of chick auditory hair cells 455

Zaccardi G → Giurfa M
Zeil J → Land MF
Zhang SW → Srinivasan MV
Zhou XM → Jen PH-S
Zhu H → Srinivasan MV
Zill SN → Frazier SF
